Doorstep criminals

Help prevent crime at the door

If you make home visits, have customers, or know of vulnerable people living nearby, you are part of their support network

Taking these simple steps will help identify and stop crime at the door

- Always make an appointment before attending someone's home
- Always show identification, even if not requested
- Check security measures - door chains and locks
- Look out for other work being carried out, such as building or gardening work. Has this been arranged with a doorstep trader?
- Have they had any recent callers or unauthorised visitors?
- If you suspect any suspicious behaviour, call the police immediately. We will make further enquiries to check the identity of companies and people involved.

If you would like any information leaflets to give to the people you visit please contact us.

Always **call 999** if you think a crime is in progress
Call 101 if it's not an emergency
